

The height adjustable table

A height adjustable table has ergonomic limitations: There's no keyboard tilt; keyboard and monitor separation height is fixed; glare reduces screen visibility; monitor sharing is limited. Make it ergonomically correct with these add-ons:

1. Standard keyboard support, KV's [Tenor Trackless Keyboard Arm](#)

- Designed for electric height adjustable tables; mounts where track-mounted arms don't fit
- ANSI/HFES 100-2007 and BIFMA G1-2013 compliant: meets requirements for seated 5th percentile female (22") to standing 95th percentile male (48.7") when used with a height adjustable table
- Provides full height, 25° tilt and storability adjustment so users can find their unique optimal position, sitting or standing
- Stores under desk for a clutter-free worksurface

Other Knap & Vogt standard keyboard arms available for use with a height adjustable table include Legato, Momentum and Ovation.

2. Single or dual monitor support such as [Concerto](#) or [Xtend](#)

- Supports flat panel displays at the correct height, angle and focal distance for ergonomic viewing
- Offers best-in-class reach (Xtend) and height adjustability with sleek designs and easy installation
- Eliminates screen glare
- Allows monitor collaboration

3. Choose from other [Accessories](#)

- Foot rest for relief while standing
- Suspended CPU holder for cable management, security and dust protection
- Laptop support to better utilize a laptop as a second monitor
- Inline document holder to reduce neck and back strain

GOOD: Retrofit a fixed-height surface with a sit-stand keyboard arm and monitor support

To create an ergonomically correct sit-stand workstation without investing in a height adjustable table, retrofit a fixed-height work surface with key components.

1. Knap & Vogt's [Momentum](#) or [Ovation](#) keyboard arm and tray combination

- Height adjustment range of more than 14"
- Provides 25° of keyboard tilt
- Stores under desk for a clutter-free worksurface

2. Single or dual monitor support such as [Concerto](#) or [Xtend](#)

- Supports flat panel displays at the correct height, angle and focal distance for ergonomic viewing
- Offers best-in-class reach (Xtend) and height adjustability with sleek designs and easy installation
- Eliminates screen glare
- Allows monitor collaboration

3. Choose from other [Accessories](#)

- Foot rest for relief while standing
- Suspended CPU holder for cable management, security and dust protection
- Laptop support to better utilize a laptop as a second monitor
- Inline document holder to reduce neck and back strain

BETTER: Retrofit a fixed-height surface with a dual keyboard arm and monitor support

To create an ergonomically correct sit-stand workstation without investing in a height adjustable table, retrofit a fixed-height work surface with key components.

1. **Duet Dual Arm** and keyboard tray combination from Knap & Vogt

- Height adjustment range of 19"
- Provides 30° of keyboard tilt
- Provides functionality and stability in a full-length secondary surface

2. **Single or dual monitor support such as Concerto or Xtend**

- Supports flat panel displays at the correct height, angle and focal distance for ergonomic viewing
- Offers best-in-class reach (Xtend) and height adjustability with sleek designs and easy installation
- Eliminates screen glare
- Allows monitor collaboration

3. **Choose from other Accessories**

- Foot rest for relief while standing
- Suspended CPU holder for cable management, security and dust protection
- Laptop support to better utilize a laptop as a second monitor
- Inline document holder to reduce neck and back strain

BEST: Retrofit a fixed-height surface with a complete desktop sit-stand workstation

To create an ergonomically correct sit-stand workstation without investing in a height adjustable table, retrofit a fixed-height work surface with key components.

1. The [Altissimo Desktop Sit-Stand Workstation](#) with single or dual monitor support allows users to move from seated to standing in a single motion.

- Height adjustment range of 25"
- Only retrofit, height adjustable device that meets ANSI/HFES, 100-2007 and BIFMA G1-2013 requirements for the seated 5th percentile female (22") up to a standing 95th percentile male (48.7")
- Provides 45° of monitor tilt
- Integrated monitor arm supports flat panel displays at the correct height, angle and focal distance for ergonomic viewing
- Eliminates screen glare
- Allows monitor collaboration
- Moves up out of the way, leaving desktop fully accessible

2. Choose from other [Accessories](#)

- Foot rest for relief while standing
- Inline document holder to reduce neck and back strain
