

# Fabric Care: Fabric refresher appliance

## Market Need:

- Small profile sliding system that operates smoothly, provides structural integrity and operates in high heat & humidity environment

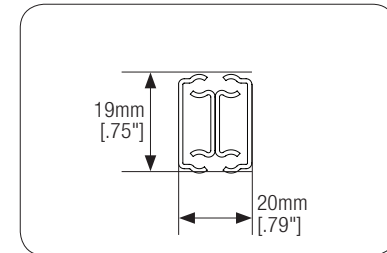

## Design Challenges:

- Materials to withstand high temperatures and humidity
- Corrosion and food particle resistant
- Smooth, quiet operation
- Ease of installation
- Full access to drawer contents
- Simple hardware attachment methods

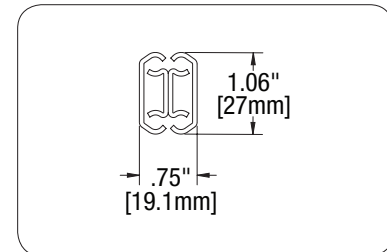

## KV Solution:

Features incorporated into fabric refresher slides include:

- Stainless Steel (304, 430 grade)
- Precision roll forming & ball-bearing technology
- Hold In detents
- Over travel extension
- Key-hole attachment features
- Anti-corrosive finishing
- RoHS compliant

- 19mm (.75") tall
- 20mm (.79") wide
- 3 member over-travel extension

- 27mm (1.06") tall
- 19.1mm (.75") wide
- 3 member over-travel extension
